

## **Science Competition** **How is your imagination?**

This year's British Science Week theme is  
**'Innovating for the future'.**

### **So what does this mean?**

Innovating means introducing a new idea or product that does not already exist. It can also mean making a change to something that already exists.

**We are launching a Science competition in school for a chance to win an amazing Science experiment kit!**

We would like you to create a new idea, product or service that we have never heard before that would make the world a better place. This could be inventing a new toy that you want to share with your friends or a useful machine that will help your family or the whole world!

You can present your innovation any way you wish. How creative will you be? Please send your pictures or innovations to Miss Hewitt via E schools.

A winner will be chosen from each phase (Reception, Year 1/2, Year 3/4 and Year 5/6).
